

Contact lens charges (per month)

Disposable lenses

One day lenses from £31.50

Monthly from £19.00

Multifocal from £28.50

Gas permeable

Various types from £14.50

Our inclusive charge covers all normal lens supplies and any standard solutions.

This includes all of the eye examination procedures necessary to ensure safe, comfortable contact lens wear, checks on your eye health and to keep your spectacle prescription up to date as well.

Members of our contact lens scheme are entitled to a 25% discount on all of their spectacles and sunglasses at all times.

Care plan

A popular scheme for occasional wearers of daily disposable lenses.

Daily disposable lenses are great for those people who want to wear lenses just some of the time - holidays, sports, socially or just because!

Our VisionPlan scheme includes all of your necessary aftercare and follow up appointments, gives our special 25% discount on spectacles, sunglasses and accessories and comes with 30 pairs of daily disposable lenses free to start you off. Additional lenses can be bought as required from £22.50 for 30 pairs.

Monthly cost from £11.00.

The Easy Way from
David Bull Optometrists

David Bull Optometrists contact lens care plan

You need never worry about the cost of your contact lenses or eyecare again.

All of your normal contact lenses, standard solutions and routine aftercare appointments will be covered once you are registered under our scheme. You will be entitled to any additional appointments your optometrist recommends and you will also have access to emergency care if needed at no extra charge.

All of our new technology is included in your examinations under this Plan, including our retinal imaging system, visual field tests and any follow up appointments that may be necessary.

Because we are an independent practice we are not limited in our choice of contact lenses. We can choose whatever type of lens suits your needs best. The best lenses mean the best comfort and the best vision.

The complete care package for contact lens wearers

Under our care plan you not only receive a comprehensive package of lenses, solutions and aftercare, but you are also entitled to a substantial discount on spectacles, sunglasses and accessories too. This applies at all times and not just when you have your routine aftercare.

Contact lens wearers need spectacles too

- If you have spectacles that you are happy with, you are more likely to give your eyes a rest from lenses occasionally
- Sunglasses can be worn over your contact lenses or can have your prescription included to use without
- You should always carry spare driving glasses in the car – a legal requirement in many countries
- New designer frames make you feel good!
- Spectacles can be great for reading in bed
- For those days when you just can't wear your lenses

Could contact lenses work for me?

More than 3 million people in the UK enjoy contact lens wear. Some use them most of the time and others just some of the time for holidays, sports, social occasions etc.

Contact lens wearers especially enjoy the freedom they offer and the fact that they don't get splashed or fog up when the weather turns bad.

Turning up to an important social occasion with a new look, or even a different eye colour can be a great morale booster and, for some people, the vision with contact lenses can be better than with spectacles.

Ask how contact lenses might be of benefit to you.
